We have been majoring in Supply & Installation of Mechanical and Electrical Works for Building Services Industry (Industrial Factories, Commercial Centers, Office Buildings Apartment Buildings, Hotels, Hospitals, Recreation Centers ...). These works are as follows:

- Electrical and ELV systems
- Heating / mechanical, ventilation and air conditioning systems (HVAC & MVAC)
- Water supply and drainage systems
- Fire protection systems (Fire alarm & fire fighting)
- Building management system (BMS)
- Other mechanical areas: Clean rooms, Compressed air system, Pressurized vapor system, equipment installation, etc ...

Since the beginning, our Company's technical staff and workers have been growing up gradually, from many projects invested by foreign & local clients throughout Vietnamese country.

We have been working under the supervision of many Consulting Engineers and Main Contractors from overseas and in-land countries. Therefore, our engineers and workers are familiar and skillful enough to the implementation of any Works in conformity with International Standards and Codes of Practice.

We have completed effectively the Works in progress, with approved quality and fulfilled successfully all requirements and expectations of Clients. As a result, we have been getting a high appreciation from Investors and Main Contractors of any big projects.

In addition, our needs to demonstrate our ability to provide consistently products at higher quality and to enhance more customer satisfaction, lead us to the application of Quality Management System. This system, designed and implemented from January, 2003, was assessed and certified as meeting the requirements of **ISO 9001:2000 Standard** by **SGS United Kingdom Ltd** and **Det Norske Veritas Vietnam (DNV)** during the 6-year period from October, 2003 to March, 2010.

Furthermore, as requested by the *International Organization for Standardization* with the promulgation of Final Draft **FDIS 9001:2008**, our Quality Management System, following a *transition process for all key changes*, was assessed and certified by **DNV** in December 2009 for a **new Certificate** which is valid until March, 2013.

In brief, we always hope to have a good relationship to any foreign / local Investors and Companies in the **spirit of co-operation** and **mutual benefit** to make our Company to a higher development from time to time in the future.
